## Game-changing treat

It's a fairly simple process: First up is a wash and condition to get rid of any dirt and bacteria that may hinder the treatment's effectiveness. This is followed by the application of an amazing serum with organic collagen and amino acids to soften locks, and an essence with protein concentrate designed to work on repairing damage and strengthening hair fibers. Next, a mini machine is used to help the hair as ingredients penetrate the hair shaft thoroughly. Finally, a serum with polymers is applied to seal in the treatment and locking its effects. Each step in the Tuckers Smooth-Curable Hair Treatment (TACKS) only takes three to five minutes, which brings us to the next point...
